CENTENNIAL CELEBRATION SEMINAR SERIES
COLLEGE OF ARCHITECTURE • TEXAS A&M UNIVERSITY

What will the future of the built and virtual environment hold for students studying architecture, construction, land development, landscape architecture, urban planning, or visualization?

What challenges are emerging “just over the horizon” that will shape the collective futures of the professions and industries serving the built and virtual environments?

What issues should the College of Architecture faculty consider as they modify disciplinary curricula so that our graduates will be equipped with the attitudes of mind and habits of work to succeed in this new world?

At the April 1 Centennial Celebration Seminar 24 leaders of the built and virtual environment professions and industries will share their insights about emerging challenges and opportunities in four 45-minute sessions:

Session One: 8:30 - 9:15 a.m.
Session Two: 9:30 - 10:15 a.m.
Session Three: 10:30 - 11:15 a.m.
Session Four: 11:30 a.m. - 12:15 p.m.

There will be a 15-minute break between each session.

Friday, April 1, 2005 • Langford Architecture Center • Building B Auditorium
